

## **Lower Extremity Prosthetic Functional Level Predictions & Outcomes Measurement Detailed Course Description/Agenda**

©2017 Clinical Education Concepts LLC

**Learning Objectives.** Attendees will...

- Identify and describe outcome measurement tools
- Identify and describe various functional levels
- Identify and describe S.M.A.R.T. Intervention Goals
- Describe Evidence Based Rehabilitation

This 1-hour course includes:

- Evidence Based Rehabilitation (EBR)
  - Clinical Experience
  - Evidence and Outcome Measures
  - Patient Needs, Values and Expectations
- Myths of EBR
  - Ignores clinical skills
  - Conflicts with client-centered practice
  - Impossible to practice
  - Ignores good evidence
- S.M.A.R.T. Intervention Goals
  - Specific
  - Measurable
  - Achievable
  - Realistic / Relevant
  - Timely / Time Specific
- Review of Functional Levels
  - K0
  - K1
  - K2
  - K3
  - K4
- Amputee Mobility Predictor
  - K-Level justification
  - Technology = Function
- Current Outcomes Measurement Tools
  - TUG
  - Symmetry Based
- Quiz / Evaluations
